

Welcome to Beaverton Periodontics!

We want your experience with us to be as enjoyable as possible. Because of this we have added services to support you in your treatment:

- An initial courtesy call to your insurance to help you understand your coverage.
- Predetermination of Benefits run through your insurance company prior to receiving treatment, so you have the most accurate information possible regarding the costs you will be expected to make.
- All treatment payments are made one week prior to treatment, which secures your reserved appointment and leaves fewer details to work through when you arrive for treatment.
- No interest 6-month financial plans are available for qualifying treatments.
- Oral sedation is also an option to help lower anxiety during treatment.

Patient education is a priority to us. If there is something you don't understand, please ask! We want you to feel empowered to make good decisions about your oral health care.

We believe in long-term health and wellness. With this goal in mind, we also provide the highest quality materials and laboratories for your treatment.

We hope you will be more than satisfied with our services.

Welcome aboard!
